Sterling		Use 90 % of replacement cost

Category/Item**Ann Dep % Useful Years****STEREO TAPES**

Stereo Tapes

Two factors are involved in depreciation of stereo tapes. Obsolence is the greatest factor in value reduction as music passes its popularity peak. Dealers advise that a stereo tape reduces 50% in value immediately after it is purchased and the seal is broken. The other factor is deterioration resulting from temperature changes & stretching of the tape after a reasonable playing period. If loss occurs within first three months after purchase date, use 75% of replacement cost. Fourth month & each month thereafter up to 14 months, subtract an additional 5% per month. eg use 70% for fourth month, 65% for fifth month, 20% for 14th month & thereafter.
