## Phase 1: Hazardous Materials

## Phase 2: Consolidated Debris Removal Program

### Hazardous Materials Removal & Infrastructure Assessments

The U.S. Environmental Protection Agency removes hazardous materials like paints, solvents, oils, batteries and pesticides from fire impacted properties. Building inspectors will determine whether a building is safe to enter.

### Public Access

Community members will be permitted to return to their properties and retrieve items once it is deemed safe by officials.

### Enrollment

Maui County collects right-of-entry forms from property owners and provides them to the U.S. Army Corps of Engineers to access private properties.

### Ash and Fire-Damaged Material Removal

The U.S. Army Corps of Engineers will remove approved fire-damaged materials from private property upon approval from the property owner.

### Environmental Testing

Environmental testing will be completed to ensure a property is safe to rebuild.

**Cultural monitors will be on-site during this process.**

### Program Eligibility and Enrollment

The Program is available to all property owners affected by the Maui Wildfires. Parcels must have destroyed structure(s) totaling at least 120 square feet to be eligible. Property owners that begin their own cleanup before submitting a Right-of-Entry (ROE) Form may be ineligible for assistance.

### Insurance Coverage

The Program is available to all property owners regardless of insurance coverage. If property owners have insurance proceeds allocated for debris removal, these proceeds must be remitted back to the County government as described in the ROE Form. All other costs are paid by the government.
